

Heidi Pattie named Vice President at Convergence Research

Cincinnati, OH – Convergence Research, Inc., is welcoming Heidi Pattie to their management team where she will serve as Vice President for business development and sales, operations management and strategy.

Mrs. Pattie joins Convergence after working for nine years at Core Logic Safe Rent. She served as director of operations until 2014 and was promoted to National Sales Director, Core Logic National Background Data in early 2015. With her knowledge of the industry and operational experience, Mrs. Pattie led Core Logic to company-wide savings of over \$10 million dollars.

“To put it simply – adding Heidi to our staff is invaluable,” said Drew Wildner, Convergence Research, Inc. co-founder. “Heidi’s reputation and leadership in our industry is unparalleled. We are excited to add her fresh and innovative perspective to our team.”

She officially joins Convergence Research, Inc. in June.

In her career at National Background Data, Mrs. Pattie oversaw customer fulfillment and satisfaction for approximately 300 wholesale clients as Customer Service Manager. Mrs. Pattie is looking forward to the opportunity to work with Convergence Research as the team continues to perfect its Tesseract Smart Search System (TS3). TS3 is a breakthrough in automated search technology providing faster and more accurate results than ever before.

“Convergence Research has a reputation for excellent customer service,” Mrs. Pattie said. “I am excited to share with the CRA’s the new technologies that are unlike anything being used elsewhere. Instead of building on antiquated search methods, they have rethought the process from the ground up, modernizing it along the way. I’m excited to lead the team that will be bringing these cutting-edge revolutions.”
