

Background Screening News

EAGLE CHECK

We are looking for a partner!

EagleCheck is a contributory decentralized database of past education and employment verifications where CRAs (background screening companies) can offer, find & reuse verifications immediately. By doing so, they will generate a new source of income, reduce their costs, and automate many of their processes.

We are looking to expand in different markets worldwide (USA and UK primarily) and reach as many users as possible to enrich our offering. If you are a background screening company or a software provider for CRAs, we'd love to hear from you!

Innovation is at our core, we are looking for a partner who is not afraid to dream big and is ready to drive the new wave of innovation in the industry with us. We believe a fairer, more efficient, and more profitable Background Screening Industry is possible, and we need you to make it happen.

After doing thorough research on the international background screening industry, we have built a network of valuable contacts who are interested in adopting our solution. Currently, our beta is ready and we have an ambitious team ready to move forward. The partnership that we are offering will take the form of an equity alliance - The partner will have the possibility to acquire a percentage of EagleCheck.

If this opportunity interests you, feel free to contact us at:
