

Background Screening News

IDI Announces the Release of Industry-Leading Applicant Screening Solution, **idiTRACE™**

idiTRACE provides background screeners with instant and tailored insight into an individual's address and alias history.

Interactive Data, LLC (IDI), a red violet company (NASDAQ: RDVT), is excited to announce the release of **idiTRACE**, the premier SSN Trace solution for the background screening industry.

An enhanced version of the technology that has powered top SSN Trace solutions for years, **idiTRACE** offers background screening organizations instant access to an applicant's address and alias history through a web application or through easy integration into existing workflows via turnkey API.

idiTRACE enables background screeners to quickly customize search criteria according to the nature of the position that a given applicant has applied for. By filtering results based on name, alias, address, and/or date of birth, background screeners can streamline their internal processes while helping their clients manage hiring risks.

The following fields are included in every **idiTRACE** report, when available:

- Address History and Associated Dates of Residence
- Name Variations (Maiden Names, Nicknames, Aliases)
- Social Security Number(s)
- Date of Birth

With historical data coverage of over 30 years and entity resolution capabilities powered by machine learning, **idiTRACE** maximizes information output while reducing false positives, allowing screeners to pinpoint the relevant records necessary to conduct thorough and efficient background checks.

About IDI

Interactive Data, LLC (IDI) was created to bring a next-generation data fusion platform and analytical solutions to the risk management industry. Through leading-edge, proprietary technology and a massive data repository, IDI's analytics and information solutions harness the power of data fusion, uncovering the relevance of disparate data points and converting them into comprehensive and insightful views of people, businesses, assets and their interrelationships. IDI solutions provide actionable intelligence in support of such use cases as the verification and authentication of consumer identities, due diligence, detection and prevention of fraud and abuse, legislative compliance, and debt recovery.
