Accio Data Welcomes HRIS Integrations Manager Casey Hudson

[Austin, TX] - Accio Data, the background screening industry's leading enterprise platform provider, announced that it has hired screening industry veteran Casey Hudson for its newly created position of Human Resources Information Systems (HRIS) Integrations Manager. With deep experience specializing in HRIS integrations, Hudson will manage partner relationships, CRA relationships, and integration projects. She will work with Accio's CRA's to leverage the collective power of the Accio Data community to secure even more HRIS integrations.

"Enabling our clients to win is a top priority for me," says Accio Data CEO Barry Boes. "Integrations are key to customer wins and expanding our already broad integration ecosphere requires intentionally involving HRIS firms, CRA's, and end users. I'm thrilled that Casey has joined the team to fill this role."

Hudson comes to Accio Data from Employment Background Investigations and Sterling where she served as manager of integrations. Utilizing her extensive experience with the HRIS integrations in the Accio Enterprise ecosystem, she is key to our plan to aggressively expand our HRIS partnership list.

"I am very excited about joining the Accio Data team and offering the integration experience I have gained from the client side of the screening industry," Hudson said. "Accio has built a strong portfolio of HRIS integrations for its customers, and I am excited to grow that list further in my new role."
